

Psychosocial Research Program
Butler Hospital

Department of Psychiatry and Human Behavior
The Alpert Medical School of Brown University

RESEARCH ASSISTANT POSITION AVAILABLE

The Psychosocial Research Program at Butler Hospital is looking to hire 1-3 full-time research assistants to work on projects related to suicide assessment in a psychiatric inpatient setting. In particular, we are hiring for projects focused on the identification of novel risk factors for suicidal ideation and behavior using laboratory-based behavioral and physiological assessments, smartphone technology, smartwatches, EEG, and sleep assessments (Michael Armev, Ph.D., Melanie Bozzay, Ph.D., Chris Hughes, Ph.D., & Heather Schatten, Ph.D.) as well as treatment development studies for suicide (Heather Schatten, Ph.D., Michael Armev, Ph.D., & Ivan Miller, Ph.D.). Start date is flexible. We are considering applicants who can start immediately through July 2024.

Butler Hospital is a Brown University-affiliated psychiatric and substance abuse hospital located in Providence, RI. Butler Hospital is one of the earliest psychiatric facilities established in the United States. The Psychosocial Research Program at Butler is one of several active research groups at the hospital. Dr. Ivan Miller is the director and the program is comprised of academic psychologists, post-doctoral fellows, research assistants, master's-level interventionists, and project coordinators. Research in this group is currently funded by numerous NIH grants, and the majority of this work centers on suicide prevention, post-hospital transitions, technology-assisted assessment and intervention, mood and psychotic disorders, and comorbid conditions (addictions and physical health problems) conducted in a variety of clinical settings.

Please see text of the specific job posting below.

Butler Hospital	Psychosocial Research Program
